WORK EXPERIENCE

Cobblestone (YC) | [Python](#), [Typescript](#)

Feb. 2025 – April 2025

Software Engineer

New York, NY

- Designed clean and intuitive UI, focusing on user experience
- Wrote optimized SQL queries for development and analysis
- Designed stable and accurate LLM **document parsing** systems
- Architected jobs and database queries, ensuring minimal user wait time
- Collaborated with 3 senior engineers, mastering clean code and best coding practices

Moonshot | [Go](#), [Cloud](#)

Nov. 2024 – Jan. 2025

Contracted Software Engineer

Remote

- Maintained and enhanced a highly scalable app serving thousands of concurrent users
- Tested, deployed, and monitored critical code facilitating millions in asset transfers
- Deployed secure and robust solutions on **Google Cloud** and **Cloudflare**, ensuring security and reliability
- Greatly boosted backend performance and reliability by optimizing Postgres, Redis, and WebSockets
- Part of the team responsible for mitigating large scale **DDoS** attack, implemented solutions

Microsoft | [C#](#), [Azure](#), [IaC](#)

May 2024 – Aug. 2024

Software Engineer Intern

Seattle, WA

- Improved security in the Azure Quantum Service by implementing **identity-based authentication**
- Seamlessly deployed to **production**. Monitored and ensured no downtime
- Utilized **Azure DevOps** CI/CD to streamline deployments
- Used **ARM templates** to manage deployments in accordance to Infrastructure as Code methodology
- Developed comprehensive diagrams and guides for team to reference
- Delivered clean, maintainable code, by swiftly and proactively iterating on feedback

JDocs | [Python](#), [AWS](#)

May 2023 – Aug. 2023

Software Engineer

Rochester, NY | Hybrid

- Developed a research-oriented testing framework for **AI developers**
- Containerized and deployed on EC2 Instances, incorporated S3 Buckets and RDS Postgres
- Designed efficient asynchronous code to meet **performance** constraints
- Deployed latest Large Language Models using external GPU provider
- Contributed to demo used for **submission evaluation** in **LegalBench** LLM hackathon

JDocs | [C](#), [Autotools](#), [Github](#)

Feb. 2023 – March 2023

Contracted Software Engineer

Rochester, NY

- Developed fast and reliable **C backend** for extracting **mobile** text messages
- Reconstructed **SQLite** database from received streamed data
- Redirected thread IO for real-time progress updates to frontend
- Created a multi-platform deployment architecture using **GNU Autotools**
- Set up CI/CD pipeline for building and deploying **cross-platform** releases using GitHub Actions

SKILLS

Languages: Python | Typescript | Golang | C# | Java | C | Rust | SQL

Frameworks: Azure | AWS | GCP | React | NextJS | Cloudflare

Developer Tools: Linux | Git | Docker | Autotools | Make | Nginx | Redis | Postgres | Vim

Communities: RIT Chess Black (Past Captain) | RIT Linux Group | RIT Climbing | RIT Taekwondo

Communication: Portuguese | Ukrainian

PROJECTS

[ai.setsero.dev](#) | [Python](#), [Typescript](#)

Current

- Developing an opinionated AI chat interface, inspired by LibreChat

PeerPet | [Golang](#)

2022, Hackathon

- Collaborated with small team to create multiplayer Tamagotchi-like game
- Implemented **centralized peer to peer** connection for data communication
- Hosted relay for peer discovery and message passing
- Ran API as **daemon process** using **systemd**

EDUCATION

Rochester Institute of Technology

Aug. 2022 – NA

Bachelor of Science — **Computer Science** | Minor in Mathematics, GIS Immersion

Rochester, NY

4th Year Status, Dean's List All Semesters
